Corrections

In the August 2009 issue, Table 2 on page 17 in the article “Functional and Cognitive Recovery of Patients With Traumatic Brain Injury: Prediction Tree Model Versus General Model” by Oh and Seo (2009; 29:12-23) should have the following numbering of the Glasgow Coma Scale:

Verbal response
5. Oriented
4. Confused
3. Speaking word
2. Making sound
1. No response

Eye opening
4. Spontaneous
3. To call
2. To pain
1. None

In Table 4 on page 19 in the same article, the regression analysis for functional disability at 1 month for pupillary reflex should be $\beta, -0.24; t, -2.61$. The regression analysis for functional disability at 6 months for pupillary reflex should be $\beta, -0.19; t, -1.99$.
